

## Mohawk Finishing Monthly Newsletter

Happy New Year! The New Year offers us a special opportunity to extend our personal thanks to our friends, and our very best wishes for the future. We consider you a good friend and extend our wishes for good health and good cheer. It is people like you who make being in business such a pleasure all year long. Our business is a source of pride to us, and with customers like you, we find each day a rewarding experience. Thanks again for a wonderful year.

### Monthly Feature

This month we are featuring two of our handy leather repair products. Just a reminder that each product is designed for specific types of leather. If you do not know the type of leather that you are working with please refer to the November newsletter. The November newsletter highlighted the different types of leather. If you do not have a copy one can be found on the [Mohawk Finishing Products](#) website.

### Ink Remover (P) (M850-2015)

The Ink Remover is a product specifically made to remove recent\* ballpoint ink marks or lipstick stains from top coated leathers, vinyl or vinyl-like surfaces. Ink removal becomes increasingly more difficult with time. Permanent markers contain solvents to increase the penetration of the dye and will not likely be removed.

\* Recent is defined as marks or stains made in a 3-5 day time frame.

#### Directions for Use:

- Rub directly over the spot a few times. Allowing 30 seconds for the ink to dissolve.
- Once you see the ink start to dissolve, use a soft lint-free cloth to wipe away both the Ink Remover and ink mark.
- For stubborn stains, a second application may be needed.
- After removal of ink, it is very important to clean with Leather Cleaner ([M850-10014](#)) to remove all residues.
- Protect the leather with Leather Protector ([M850-10064](#)).

## Leather Glue Water Based (A, B, P) (M850-2032)

Leather Glue is a flexible, strong adhesive formulated specifically for repairing flaps, abrasions, and minor cuts. It can also be used to repair larger cuts in conjunction with a backing material. Its flexible nature allows it to be used on leather without modifying the leather's characteristics.

### Directions for Use on Small Repair:

- Clean the area to be treated with Leather Cleaner ([M850-10014](#)).
- Apply Leather Glue with a thin spatula directly on the edges of the leather to be repaired. Use only the minimum amount of product required.
- Remove all excess from the leather.
- Join the parts and hold them firmly together for about 1 minute. Remove any additional excess immediately.
- Allow the area to dry completely.
- After repairing, use Leather Protector ([M850-10064](#)) to give the needed protection against soiling.

### Ordering

You can order the featured products or any of our products by contacting your account representative, customer service or on our web site [www.mohawk-finishing.com](http://www.mohawk-finishing.com). To ensure your correct pricing level please be sure to use your account number.
